

TED Talk Reviews

Background:

Students will be watching TED talks of their choosing throughout the years and we want to start of data base with reviews, on a similar idea to Amazon ratings and reviews. This will serve as a record of reviews by students as well as a tool for future students to look at. This will also help faculty track who has done review in a given term.

Elements:

Public (Displayed) Information

Title

Author/Presenter

Reviewer Name

Reviewer Score (1 point for a review, 3 points for first review of a given TED Talk and entering it into the data base) [Calculated]
